SUMMARY

As an Informatics Engineering student, I have an interest in the field of software development. I have a strong dedication to continuous learning and this drives me to improve my skills and contribute effectively to innovative projects

EDUCATION

Dian Nuswantoro University
Minor in Informatics Engineering • 2025

POJECTS

Punggur Besar Profile Website
https://punggurbesar-web.vercel.app/ • August 2023

- Participated in a project to develop a profile website for the village of Punggur Besar. I joined the team as a front-end developer, utilizing ReactJs Framework and Tailwind CSS to create a responsive and user-friendly interface.

Online Presence using Selfie and Geo-Location
https://github.com/AzisWh/Absensi-App-Laravel • April 2024

- Developing a website as a requirement for my internship course. The website is designed to manage the attendance of interns based on selfie and location at Humas Pemerintah Kota Semarang, utilizing the following TechStack : Laravel 9, MySql and Geo Location library

Inraga as CTO
Program Pembinaan Mahasiswa Wirausaha • https://inraga.id/ • April 2024 – Present

- As a Chief Technology Officer, I developed a website for our digital business, this website is currently in the development stage which will later have features for field rental, event tickets, looking for opponents, looking for trainers and e-commerce, utilizing Laravel Framework and Flutter for mobile app

Organization Experience

Himpunan Mahasiswa Teknik Informatika • November 2021 – July 2024
As a field of information and communication (INFOKOM)
- Facilitated communication between student organizations both within and outside the campus
- Participated in creating posters and Instagram feeds for special occasions
- Joined the SEMNASTI 2023 event as part of the design team and helped create design mockups for souvenirs using Figma
- Developed the landing page website for HiTalk 2023
